Highlight - Recovery Case

Stanton, California | Electronics | March, 24

Overhaul's GSOC and LE Connect recently played a crucial role in the successful recovery of a shipment of electronics in Southern California. The shipment was detected by Overhaul's GSOC as deviating from its established route and heading towards SOCAL, where it stopped at a warehouse in Stanton, CA. The LE Connect Team was immediately activated and contacted the California Highway Patrol for assistance.

Upon arrival, the officers witnessed electronics being unloaded at the location. However, they were unable to enter the warehouse without a warrant.

The next morning, the California Highway Patrol had the warehouse under surveillance and observed a tractor-trailer arrive and more unknown product being unloaded. Once they obtained the warrant, they locked down the warehouse and detained all suspects.

Upon inspection of the trailer, it was discovered that it was empty and the suspects were in the process of loading the electronics into the newly arrived tractor-trailer. Thanks to the quick actions of Overhaul's GSOC and LE Connect, the cargo was secured and taken back to its origin, preventing any potential loss for the client. This successful recovery is a testament to the effectiveness of Overhaul's logistics risk management software and services in preventing cargo theft and other issues while in transit.
