In-Transit

In March 2024 at 9 a.m. at the height of Tepeji del Rio, Hgo. on the Mexico-Querétaro highway (MEX-57D), MSOC lost communication with the driver of a unit with clothing and footwear merchandise. At the same time it received an alert of a risk situation from the escort, so it activated the emergency protocol with the authorities. Although the offenders made use of signal jamming devices, MSOC kept a watchful eye on the GPS device updates, resulting in the recovery of the unit with seals in Teoloyucan, Mex. with one detainee.
